

Diamond Uses of DAWN Science

NOBUGS 2014

Peter Chang

Diamond Light Source Ltd

UK

Content

1. Introduction to DAWN Science
2. Java interfaces for data analysis and visualization
3. Applications at Diamond
4. Future developments

Data Analysis WorkbeNch

- Eclipse plugin technology based on OSGi
- Science Working Group for interoperability of plugins
- Incubator project
- Definition of interfaces and services necessary for data analysis and visualization

Data access

- Loader service for many file formats:
 - HDF5
 - CBF
 - common images PNG, TIFF, etc
 - proprietary area detector outputs
 - plugin extensibility for other formats

Datasets

- N-dimensional, multiple types
- Lazy loading capability
- Slicing for subsets
- NumPy-like broadcasting in many operations
- Library of mathematical and statistical operations

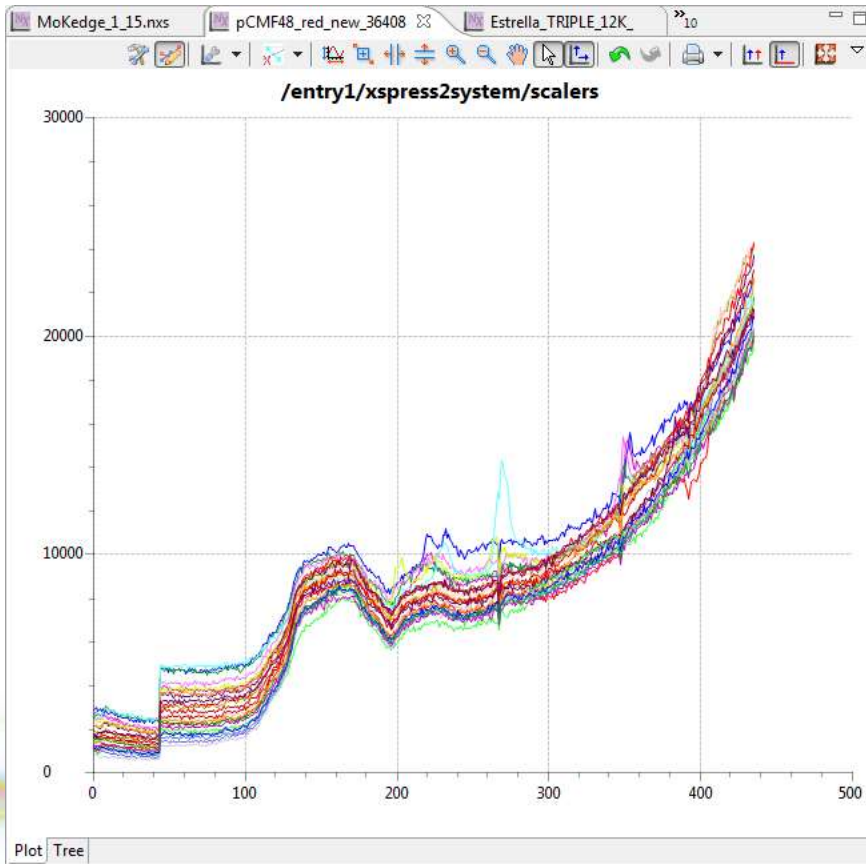

Metadata

- Can be loaded independently of data
- Associated with files and also datasets
- Experimental context and environment
- Units, errors, scan positions, etc

Data visualization

- Standard line and image plots provided by Eclipse Nebula project's XY graph
- 2D surface plots with jReality

Da I He L No Co

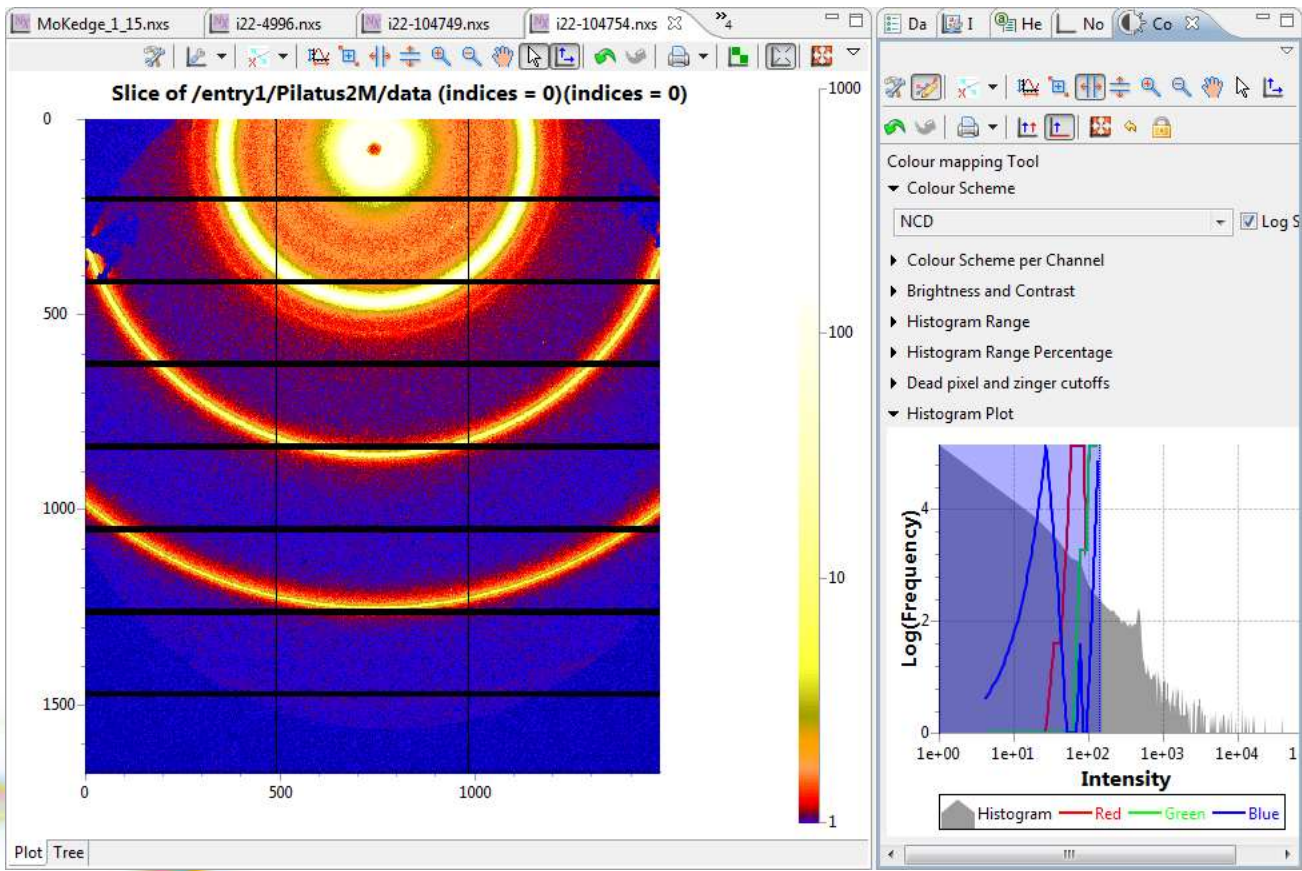

Name	Shape
<input type="checkbox"/> xspress2system/Energy	[436]
<input type="checkbox"/> xspress2system/FF	[436]
<input type="checkbox"/> xspress2system/Time	[436]
<input type="checkbox"/> xspress2system/cold_head_temp	[436]
<input type="checkbox"/> xspress2system/raw scaler in-win	[436, 36]
<input type="checkbox"/> xspress2system/raw scaler total	[436, 36]
<input type="checkbox"/> xspress2system/sample_temp	[436]
<input checked="" type="checkbox"/> xspress2system/scalers	Y1 [436, 36]
<input type="checkbox"/> xspress2system/tfg clock cycles	[436, 36]

Di...	Type	Slice Value	Axis Data
1	X		Energy
2	Y (Many)	all (click to change)	indices

Data visualization

- Standard line and image plots provided by Eclipse Nebula project's XY graph
- 2D surface plots with jReality

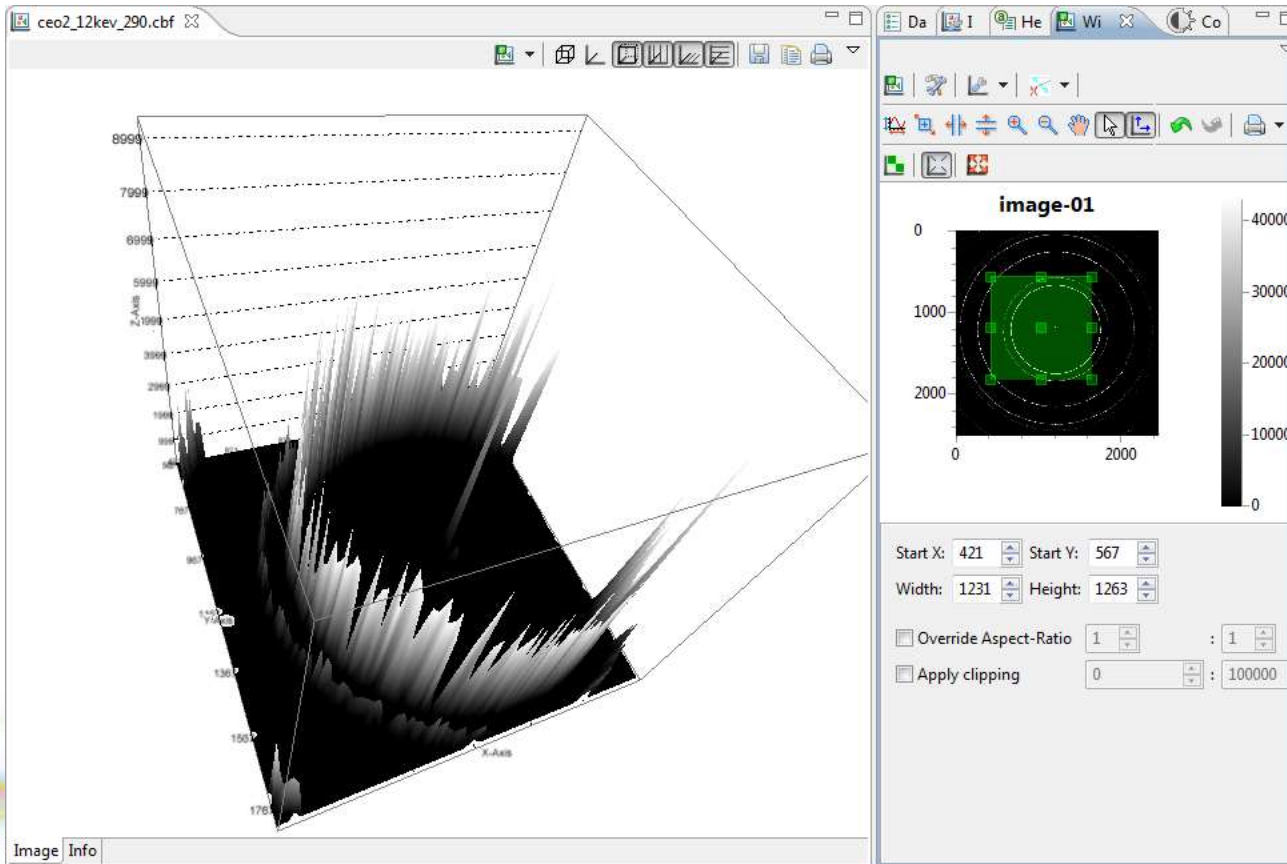

Data visualization

- Standard line and image plots provided by Eclipse Nebula project's XY graph
- 2D surface plots with jReality

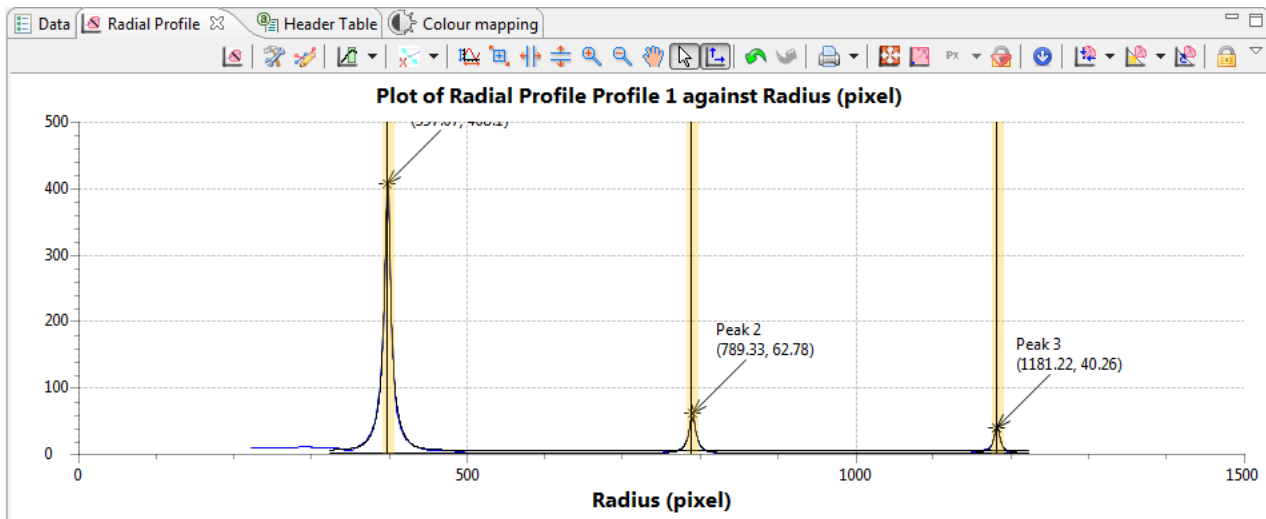

Regions of Interest

- Many 0D, 1D and 2D regions provided:
 - Point, line, polyline, conic sections
 - Polygon, ellipse, annular sector
- GUI tools for interactive creation with displayed data

Peak Fitting

Trace	Name	Position	Fit	FWHM	Area	Type	Algorithm
Radial Profi...	Peak 1	397.0682	408.10154	10.01174	6456.74882	PseudoVoigt	GeneticAlg
Radial Profi...	Peak 2	789.33258	62.77947	10.04722	986.68122	PseudoVoigt	GeneticAlg
Radial Profi...	Peak 3	1181.22496	40.2571	10.16054	722.66829	PseudoVoigt	GeneticAlg

Fit attempted: '3' PseudoVoigt's using GeneticAlg with smoothing of '1' ([configure smoothing](#))

\\Data.diamond.ac.uk\i03\data\2013\cm5926-1\jpegs\0130\thau3\test_1_38.0.png

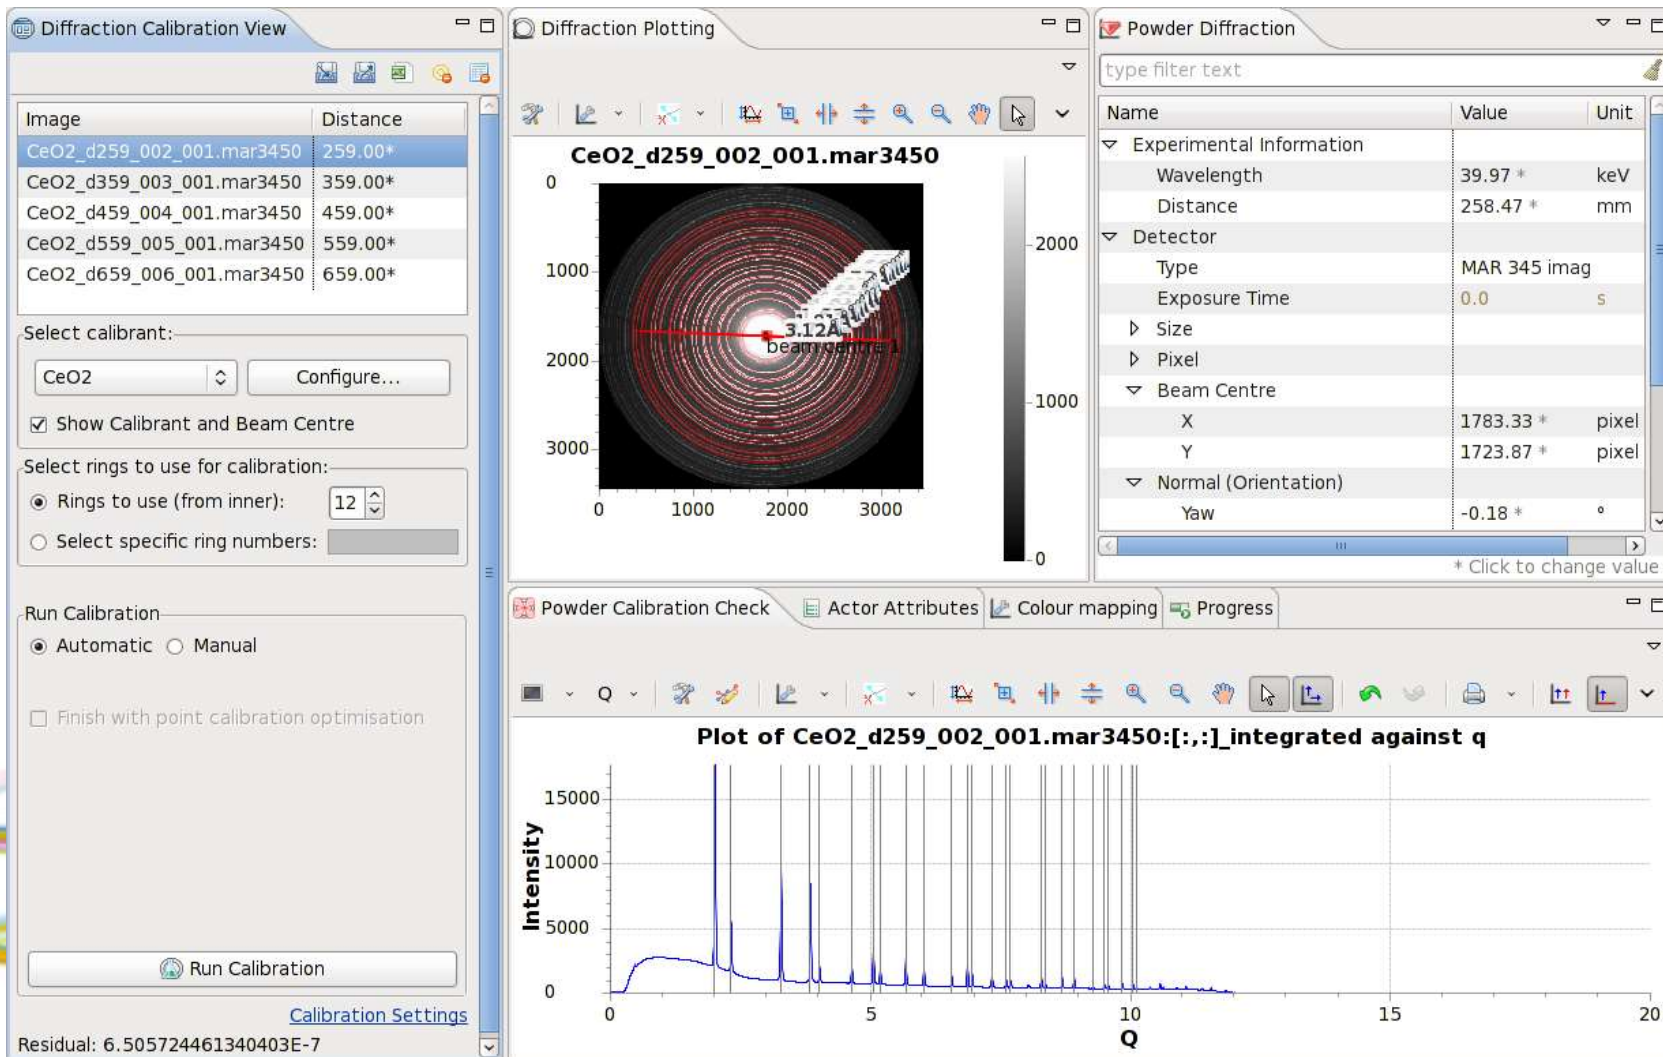

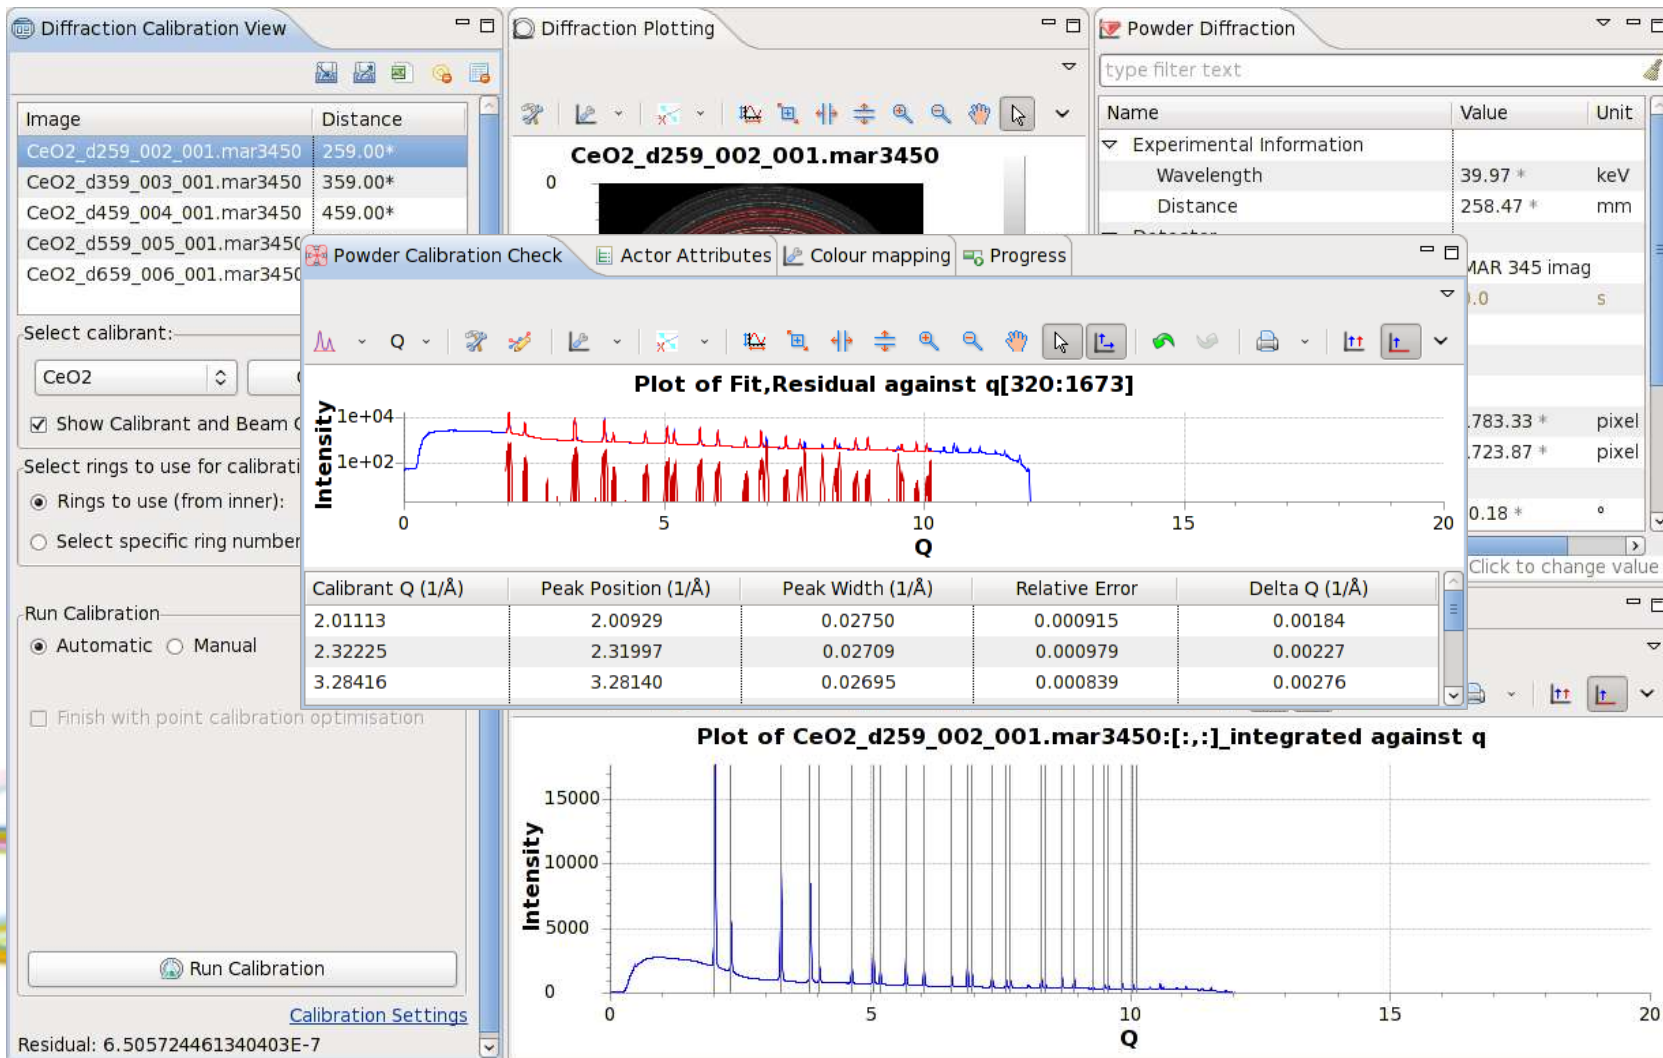

Micrograph showing a crystal (likely a protein crystal) with a bright spot indicating the diffraction pattern. The crystal is dark and irregularly shaped, with a bright, multi-colored spot (diffraction pattern) on its surface. A red scale bar is visible in the bottom right corner of the image, with a length of 100 µm.

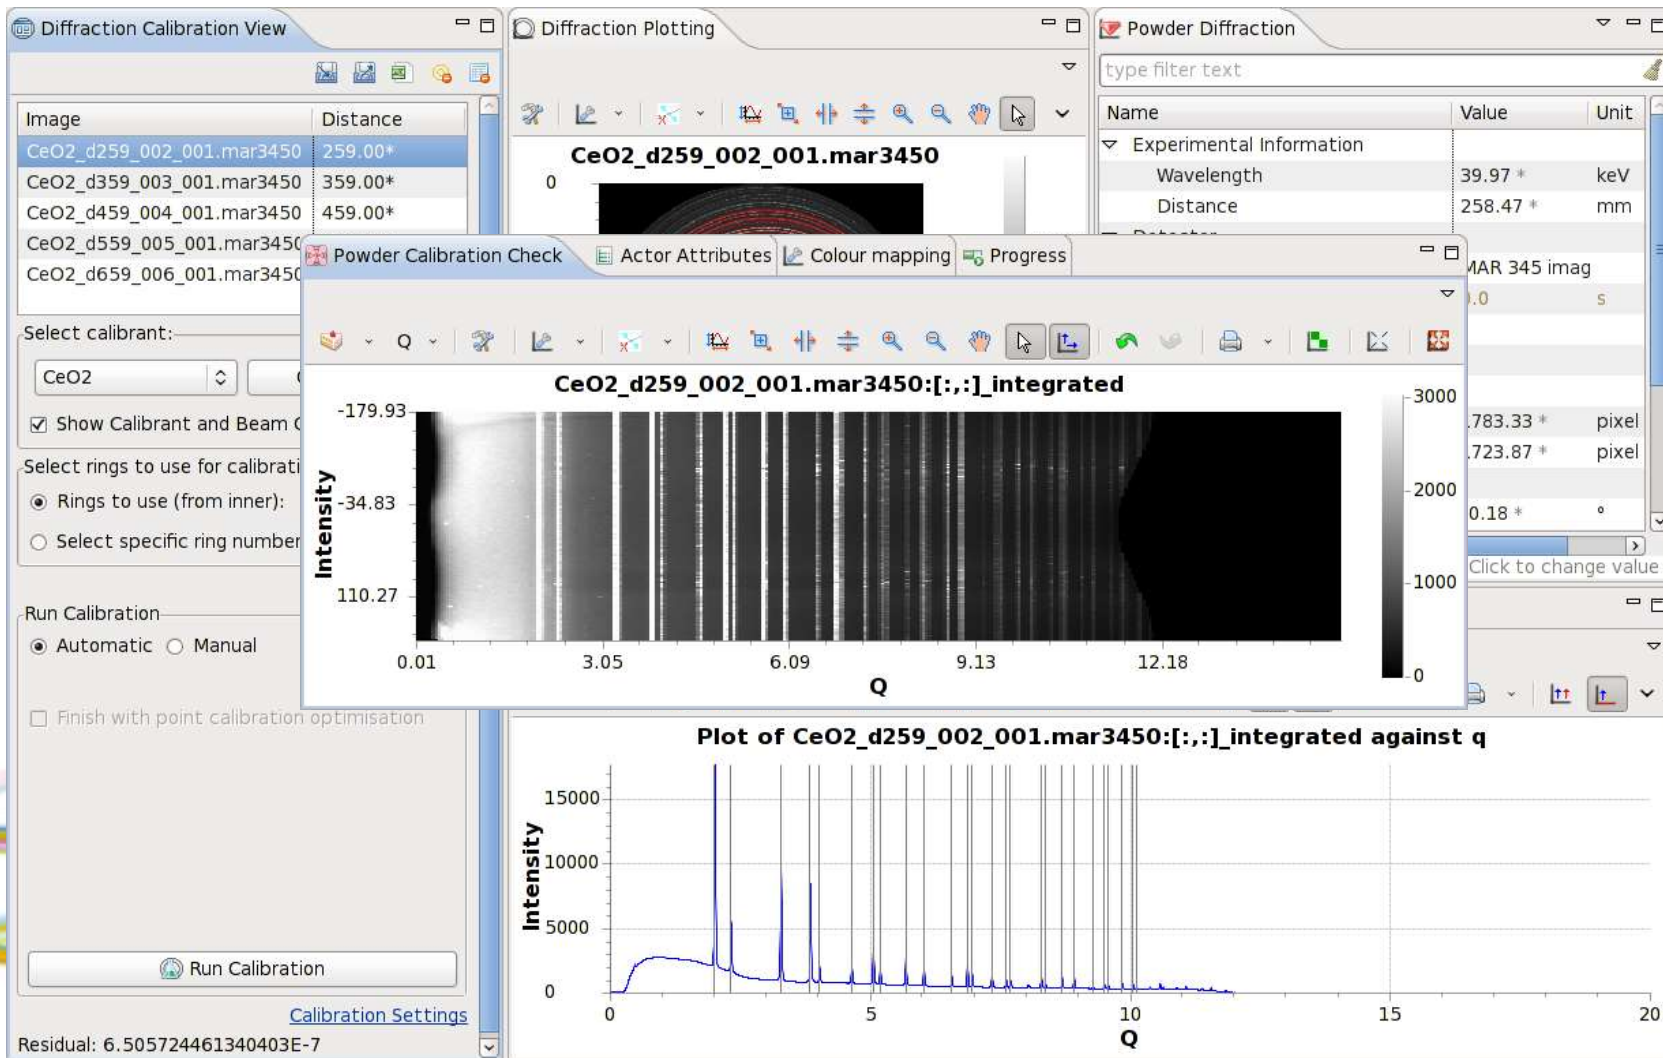

2D powder diffraction

- Calibrate detector orientation and position and source wavelength with images of calibrant diffraction rings
- Reduce multiple images of test material

Export Reduced Data

This wizard runs 'Powder Integration' over a stack of data. Please check the data to slice, confirm the export file and then press 'Finish' to run 'Powder Integration'

Dataset Name: image-01

Output File: /home/ceo2040keV-integ.nxs

Overwrite file if it already exists

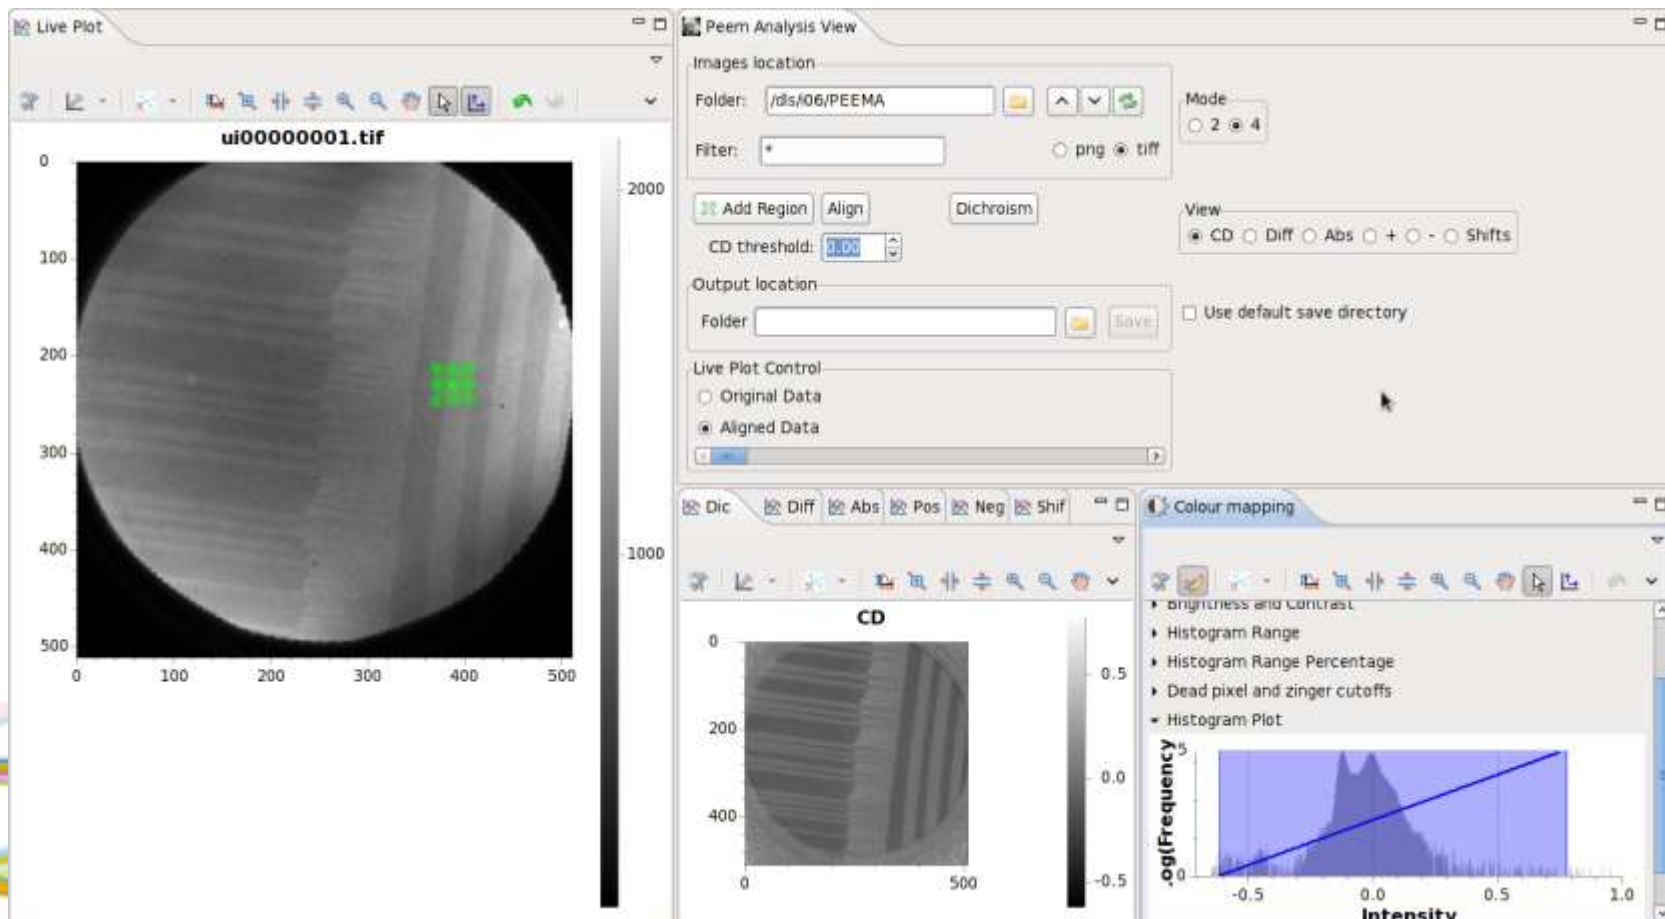

Dim	Type	Start Index or Slice Range	Axis Data
1	[Range]	5:18 (click to change)	indices
2	X		indices
3	Y		indices

Cancel Finish

Photoelectron emission microscopy – XMCD analysis

- Inspect and align images
- Calculate circular dichroism

Future work

- Commit concrete implementations to Eclipse project
- More visualization including volume rendering of isosurfaces with JavaFX
- Lazy or deferred evaluation of operations on datasets
- Error propagation in operations on datasets

- For more details on the applications shown and other DAWN applications (including angle-resolved photoelectron emission spectroscopy data reduction), see posters PS-01 and PS-16
- Check out www.dawnsci.org
