ISIS Run-up/machine physics																		
H Nakanishi			←															←
Y Irie			←															
Availability for LOI Experiments			50Hz-swept mode, MCR RF control system															
Cavity operation																		
cavity bias current			dc	dc	ac	ac	ac		ac	ac	ac	dc	dc					
waveform distortions			←————→															
operation from MCR (with AVC-, Bias-, Cavity lock-loops)						Bias-loop optimization	←————→ stable operation											
output impedance (high-power measurements)												variable shunt-resistors, constant frequency measurements with bias tuning						
Cabling to SP6																		
breakout box																		
lay cables			} Completed by middle of January (?)															
cable terminations																		
check
