## Seminar

# Supercomputer simulations of dark matter structure formation in the Universe (in English)

SPEAKER : Prof. Tomoaki Ishiyama

(Chiba University)

DATE : Oct. 4th (Thu.) 15:30-

PLACE : Kenkyu Honkan 1F, Meeting Room 1

We report the results of ultralarge cosmological N-body simulations of small and large scale structure formation in the Universe. In particular, I focus on the formation and evolution of dark matter halos and subhalos near the free streaming scale, and their impact on the indirect dark matter detection experiments. We also present the implementation of our massively parallel simulation code for modern huge supercomputers.
