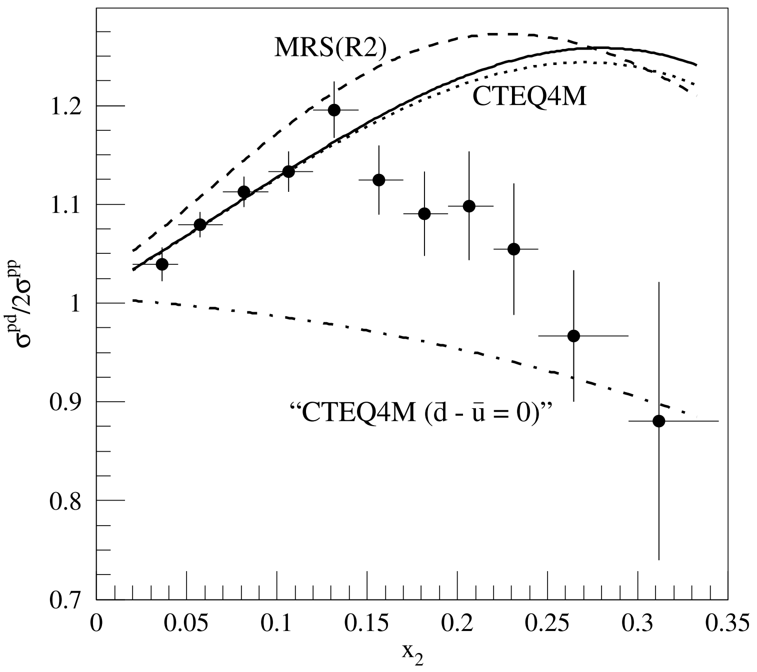
Note added in proof. The E866 Drell-Yan results were published at the proof stage of this paper. Because of its importance in confirming the NMC and NA51 flavor asymmetry, the author adds this figure on the E866 data with the consent of the editor and an E866 physicist, M. J. Leitch. See Section 5.1.1 for explanation.



The ratio $\sigma^{pd}/(2\sigma^{pp})$ of Drell-Yan cross sections by the E866. (taken from Ref. [20]).
